👨‍💼 **Job Role:** Data Analyst V

🛠️ **Skills Required:** Advanced Microsoft Office (Excel, Word, PowerPoint), Business objects, TMHP Software, Claims processing engines, SQL, R, SAS, Python, Data analysis, Statistics, Data visualization, Medical claims data, Methods of funding, Program rules, Medicare, Medicaid, Texas legislative process, Principles of leadership, Data quality and integrity processes, Process improvement or quality assurance systems

▼ 🔍 **Full Job Description**

The Data Analyst V position performs highly complex (senior-level) data collection, reporting, and analysis to monitor, evaluate, and increase efficiencies for Acute Care. The DA V defines, develops, and implements data standards, data quality measures, analyzes data quality results, and implements necessary changes to ensure data quality improvement. This position also oversees, plans, directs, monitors, and guides others in the use of key analytic functions relating to the Data and Research team within Acute Care.

📊 **Skill Match Score:** 5%

📄 **Cover Letter:**

Dear Hiring Manager,

I am excited to apply for the Data Analyst V position at your organization, where I can leverage my skills in data analysis, machine learning, and statistics to drive business growth and improvement. With a strong educational background in Computer Science and Computational Data Science, I am confident in my ability to perform complex data collection, reporting, and analysis.

As a detail-driven and analytical individual with over 2 years of experience in analytics and modeling, I am well-equipped to define, develop, and implement data standards, data quality measures, and analyze data quality results. My experience in developing biostatistical and computational genomics methods to analyze large-scale biomedical data has prepared me to work with complex datasets and uncover hidden insights.

I would like to highlight my projects, including Walmart Sales Forecasting (https://github.com/SakethRamkalavakuntla/Walmart-Sales-Forecasting.git) and Metaphor

Detection using NLP (https://github.com/SakethRamkalavakuntla/Metaphor-Detection-using-NLP.git), which demonstrate my ability to apply machine learning and data science concepts to real-world problems. Additionally, my Book Genre Prediction app using BERT (https://github.com/SakethRamkalavakuntla/Book-Genre-Prediction-app-using-BERT.git) showcases my skills in natural language processing and deep learning.

I am excited about the opportunity to bring my skills and experience to your team and contribute to the success of your organization. Thank you for considering my application.
